Tuning a Top team: Systemic Team Coaching

Do you want to strengthen the performance, resilience and wellbeing of your team?

Are you up for learning new skills that build bridges with your stakeholders? Would you like your team to become a catalyst for transformative change in your organisations? If yes, this team coaching programme – for leadership teams wanting to achieve excellence – is for you.

This team coaching programme is designed to:

01

Build a stronger team identity through increased trust and confidence

02

Increase stakeholder engagement by having a compelling purpose and clear priorities

03

Uplift performance and wellbeing by shifting into a more creative and strategic space

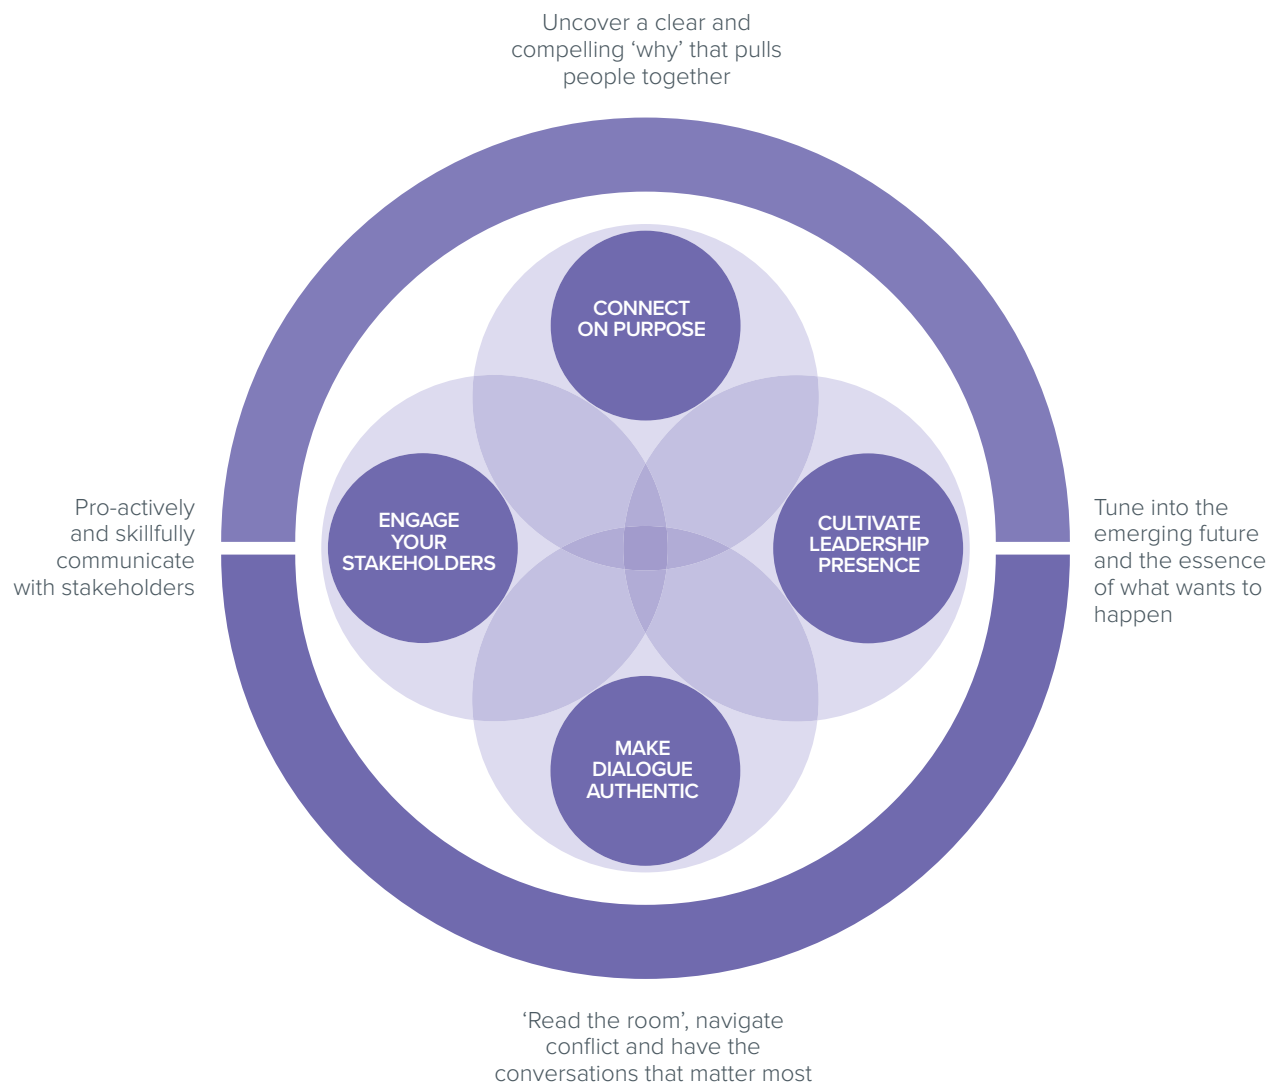

Our approach

This programme is a 9-12 month journey that consists of three sessions. Each of the two-day sessions includes an overnight stay to enable deeper learning. Before each session there are one-to-one conversations with the team leader and team members to discover best outcomes and to start to create a safe and energising 'container' in which to do the work.

The programme draws on in-depth expertise in a range of disciplines including organizational development, applied psychology, and systemic coaching and constellations. Each session includes a weave of exercises, inputs and dialogue to address real business issues and create a culture of learning, enabling the team to be at the top of their game.

The programme will enable team members to develop their capacity, individually and collectively, in four core inter-related areas:

Four Core Capacities
